

Get your Glow on NOW

The In-Bay Automatic Entry System Paydrop LED plinths has a HUGE 19" touchscreen. The 6mm bonded glass overlay and the high IP ratings ensure reliable functionality in wet environments.

The Paydrop includes an integrated LED light display within the upper drop cowl and lower pedestal base, that is configurable as to colour palette and sequences.

When a customer processes their transaction, the plinth glows green to confirm a successful transaction, and to indicate to move into the washbay.

The video-capable touchscreen enables you to display your branding, run promotional videos and guide your customers through their wash purchases.

The Paydrop was specifically designed with colourful illumination to catch the eye of drive-by traffic, reminding and enticing potential customers to your carwash, as a silent salesman.
