

Why Touchscreens?

Touchscreens enable you to display your branding, run promotional videos and guide customers through their wash purchases while offering the ability to upsell and add on wash offerings.

PSS Touchscreens integrate fully with the TAP & PA\$\$ App and PSS OPT Activation Portal, to give the retailer full reporting and deal management with total visibility into your entire site-wide carwash business.

Available in a range of sizes to suit different applications, such as Dogwash, Vacuum, Self-Serve and Carwash meter boxes.

Auto Carwash kiosk with a 19" 4:3 ratio touchscreen

Power Vac
Combo unit with 7" 16:9 ratio touchscreen

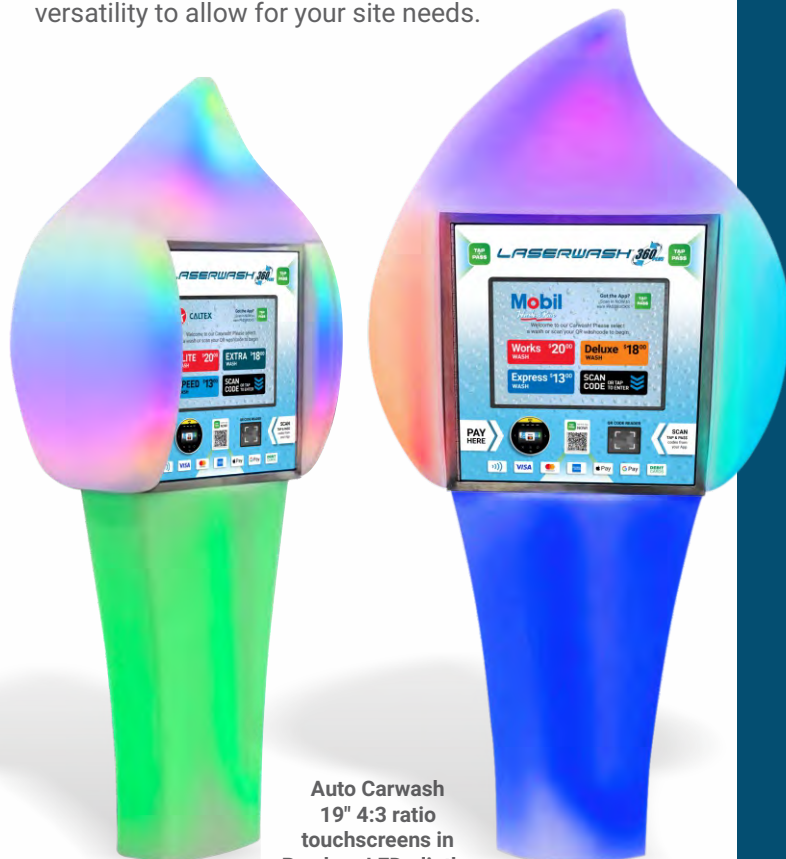

Retrofitting to your existing Appliances

PSS can custom retro-fit a touchscreen to your existing appliances in most cases. PSS also has liaisons with some well-known suppliers such as GinSan to be able to incorporate the system components at manufacture, which translates to cost savings at the install stage.

The Touchscreens can be rear mounted or face-fitted, depending on the application, so there is built-in versatility to allow for your site needs.
